

BIG DIPPER[®] W-250-AST WITH ADVANCED MAINTENANCE ASSISTANT

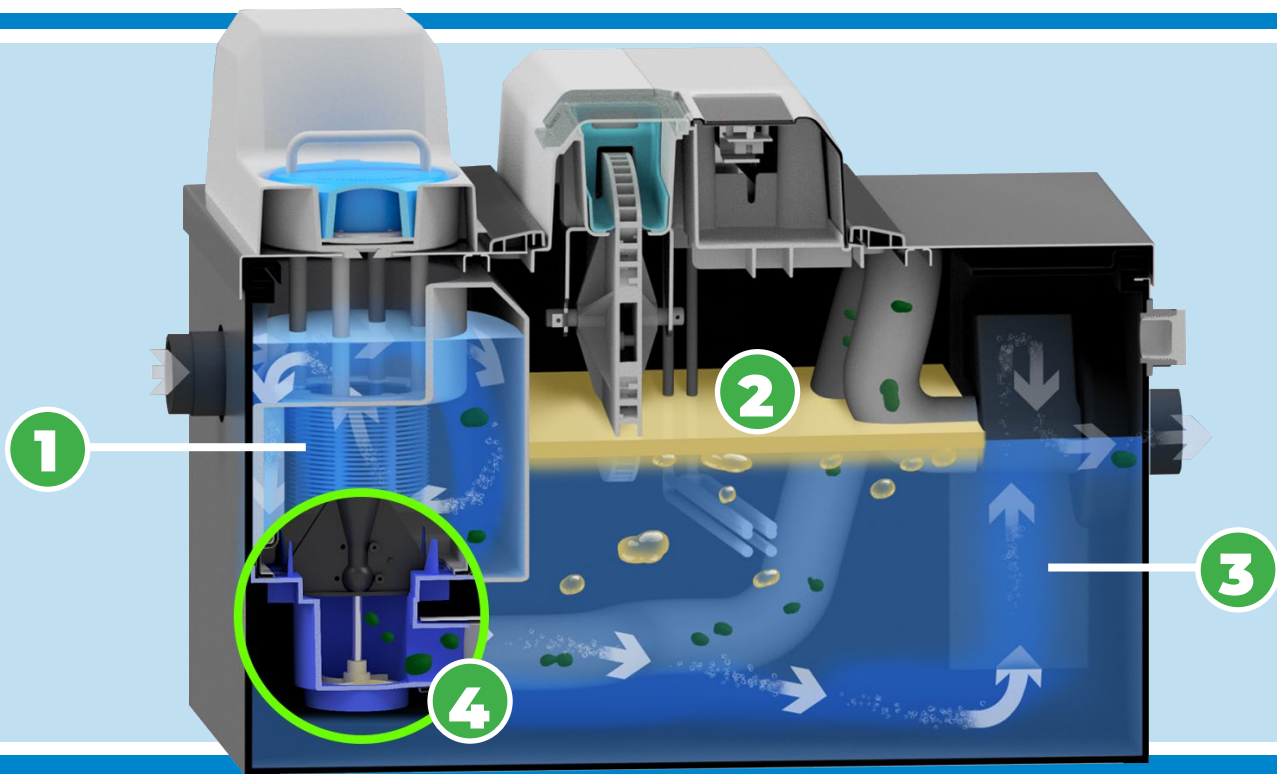

The Big Dipper automatic grease removal device lets you take control of grease and small food particles in an easier and more hygienic way. Its electrical assembly includes a heater, skimming wheel and skim setting controls that work together to remove grease from the tank and store it in a separate grease collector.

With the **NEW Advanced Maintenance Assistant** option, select Big Dipper Units, including the W-250-AST, also automatically empty small food particles from the basket filter, sending them down the sewer line. Taking just 1 minute a day to empty the grease collector limits exposure to small food particles, grease and fats while eliminating pumping fees.

- Hygienic solution with minimal exposure to grease and small food particles
- Proprietary pump automatically jettisons small food particles down the line
- Advanced odor protection keeps odor inside the tank
- Minimal maintenance is ideal for remote locations where servicing can be difficult

BIG DIPPER[®] W-250 WITH **ADVANCED MAINTENANCE ASSISTANT**

HOW ADVANCED MAINTENANCE ASSISTANT WORKS

- 1** The basket filter traps small food particles, allowing FOG and water to flow through
- 2** The unit captures the grease and skims it into the grease container
- 3** Clean water flows out of the unit through the outlet baffle
- 4** A proprietary pump jettisons small food particles into the sewer system

SPECIFICATIONS

Exterior: 304 Stainless Steel, Bright Finish
Interior: Rotationally Molded Polyethylene
Electrical: 115 VAC, 50/60 Hz, 1400 W (12.2 A)
Flow Rating: 25 GPM (1.6 l/s)
No. of Skimming Wheels: 1

Skimming Rate: 9 lbs (4.08 Kg)/Hour
Grease Retention Capacity: 73.3 lbs (33.2 Kg)
Separation Efficiency: 97.7%
Inlet/Outlet: 2" (50 mm)
