

The WWFD-KIT replaces the Wheel Wiper Flip Door ONLY. This replacement is for flip doors with circle magnets.

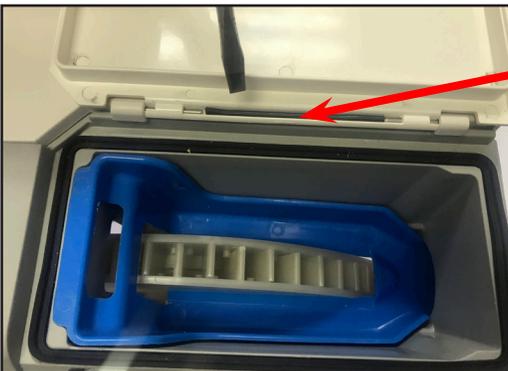

Parts included in a WWFD-KIT: replacement door, two metal pins, and rubber gasket.

Additional tools needed: Flathead screwdriver

1. Remove defective cover and place new cover in the open position between the intact hinges

2. Place one (1) metal pin in center groove. Use the screwdriver to slide pin to one side until latched onto hinge. Repeat for the second hinge.

3. Place rubber gasket between metal pins. Use a flat head screwdriver to secure rubber if needed.

4. Close the new flip door. You should now be able to open and close the flip door to access the wiper blade for weekly maintenance.
